EcoMind AI — Enterprise Sustainability Disclosure Report

Framework Alignment: GRI Standards / ISSB S2 | Organization: EcoMind Test Org

Reporting Period	2024-Annual	**Facility Boundary**	HQ-BLDG-01
Publication Date	October 25, 2026 15:44 UTC	**Data Completeness**	**100.0%** (12/12 Verified)
Methodology Version	EcoMind Sustainability Engine v2.4	**Assurance Standard**	ISAE 3000 Limited Assurance Ready

Part 1: Environmental Performance Disclosures

GRI Code	Indicator Name	Disclosed Value	Unit	Provenance	Verification Source
GRI-302-1	Total Energy Consumption	**0.00**	kWh	**Estimated**	Energy Metering Subsystems
GRI-302-3	Energy Intensity	**0.00**	kWh / m²	**Estimated**	Calculated (10,000 m² operational boundary)
GRI-305-1	Direct GHG Emissions (Scope 1)	**42.60**	MT CO2e	**Estimated**	Stationary Natural Gas Combustion Records
GRI-305-2	Indirect GHG Emissions (Scope 2)	**0.00**	MT CO2e	**Measured**	Grid Carbon Accounting Engine (EPA eGRID)
GRI-305-4	GHG Emissions Intensity	**0.00**	kg CO2e / unit	**Measured**	Calculated kg CO2e / kWh
GRI-303-1	Total Water Consumption	**1,845.00**	m³	**Estimated**	Municipal Utility Records / ERP
GRI-306-3	Total Waste Generated	**34.20**	Metric Tonnes	**Estimated**	Waste Manifest Audit via ERP
GRI-306-4	Waste Diverted from Disposal	**68.5**	%	**Estimated**	Certified Hauler Recycling Receipts
GRI-302-1-REN	Renewable Energy Share	**18.4**	%	**Measured**	Onsite Rooftop Solar & Clean Power PPA

Part 2: Social Performance Disclosures

GRI Code	Indicator Name	Disclosed Value	Unit	Provenance	Verification Source
GRI-403-9	Lost-Time Injury Frequency Rate	**0.00**	Incidents	**User-Entered**	Corporate EHS Incident Log
GRI-404-1	Sustainability Training Hours	**28.50**	Hours	**User-Entered**	HR Learning Management System

Part 3: Governance Performance Disclosures

GRI Code	Indicator Name	Disclosed Value	Unit	Provenance	Verification Source
GRI-2-9	Board Sustainability Oversight	**Formal ESG & Sustainability Committee Chaired by Lead Independent Director**	Status	**User-Entered**	Board Governance Charter 2024

Methodology, Boundary & Carbon Accounting Disclosures

Accounting Standards: Greenhouse gas calculations conform to the GHG Protocol Corporate Accounting Standard. Scope 2 emissions utilize location-based grid emission factors published by the US EPA eGRID and UK DEFRA. **Operational Boundary:** Energy, water, and waste metrics represent 100% operational control across designated facilities. **Data Lineage & Auditability:** Measured values derive from calibrated submeters and validated utility billing records. Simulated and estimated figures are explicitly categorized to prevent greenwashing and comply with Corporate Sustainability Due Diligence Directive (CSDDD) expectations.
